SS Architecture & Associates is a dynamic architectural practice, based in Durbanville, Cape Town, South Africa. Architecture is both an art and a science. We believe in addressing both these aspects of architecture by creating products that are functional, practical and comfortable spaces to live in, but also aesthetically pleasing. Because we work with individuals and individual tastes, our approach is to first assess our clients' exact needs. We believe in a close working relationship with our clients in order to create a distinct product that answers their needs, fulfils their vision and exceeds their expectations.

About SS Architecture & Associates is a dynamic architectural practice, based in Durbanville, Cape Town, South Africa. We originated in 2005 and was re-established in June 2011 as an exciting new business entity. Our team headed by director Riaan Smit are a creative and dynamic group of individuals working together with a shared vision of providing our clients with a professional service. Together, we strive for contemporary design solutions that are client specific, site sensitive and environmentally friendly. As a team, our company dynamic is made up of architects, architect technologists, interior designers and administrative support personnel, all committed to professional business ethics, design integrity and superior project administration and project management. We

provide a full range of professional architectural services including alterations, Additions and restorations in the Northern Suburbs, Cape Peninsula, the Boland and surrounding areas. Our extended portfolio also includes work in the West Coast, Southern Cape, Overberg and Gauteng. Cultivating personal relationships with our clients, enables us to better understand each client's unique needs. We are motivated by our client's needs, meeting them specific requirements in an innovative and personal manner. This results in the creation of a product that fulfils visions and exceeds expectations. Without passion, there is no drive, and lacklustre finishes are the unfortunate result. We have an established network of industry professionals that allow us to complete a project with the best, and most reasonably priced products and tools whilst also making sure the entire process is smooth-running. We have been providing professional architectural services since 2005. Collectively our architectural professionals have over 20 years' experience in the architectural and construction industry. We have successfully completed a wide range of projects in several sectors of the architectural and building industry. We believe in adding value to any project by using innovative design and cost-effective solutions. Our honest approach to hard work, backed by our collective experience and integrity in our relationships with clients, associates, contractors and sub-contractors are all factors that contribute to our success. Our vision is to help build dreams by delivering smart, cost effective and innovative architectural designs, solutions and services. Our mission is to ensure that all our clients receive a professional architectural service, individual attention to finer detail and quality
