How Do I Know That I Might Be Pregnant? Some of the signs of early pregnancy include: Missed periods, Nausea and vomiting, Breast changes, Tiredness or fatigue, Frequent urination. The above signs may be caused by other illnesses as well. It is recommended that you visit your doctor if you suspect being pregnant.

What can I do to stop nausea during early pregnancy? Morning sickness can be unpleasant and distressing. These are a few suggestions to relieve nausea: Select foods that are easy to digest and high in protein, Drink plenty of cold fluids, Avoid foods triggering nausea, Rinse your mouth after vomiting, Try to take your prenatal vitamins, Snack often. Eating foods containing ginger may assist.
